Projects:

Portfolio Website(Link:)

Smart Safety Monitoring System for Sewage Workers using IOT

Iris Flower Classification using KNN Algorithm

Websites:

Developed the following 3 responsive website using React and Bootstrap for the frontend, and Node.js with MongoDB for the backend. Designed using the regular front end languages. Utilized GitHub for version control. Conducted automated testing with Jest and monitored performance using Google Analytics.

SBook Libraries

A Book website featuring detailed Personal book blog, Book Listings, a personalized To-read List, an interactive comment section, a smart Recommendation System, and a beautiful image gallery, all designed to enhance reading experience and community Engagement.

Simple Cookbook Website

Created a cooking Book website showcasing a variety of easy recipes, each with clear instructions and ingredient lists. Users can easily navigate, bookmark their favorite recipes, and share their culinary creations. This platform serves as a go-to resource for cooking enthusiasts, offering inspiration and guidance in the Kitchen.

Focus Banjara Driving School Website

Currently developing a website for driving school that features a detailed listing of available cars, details of the cars, instructor profiles, class schedules, pricing and available time slots. This user-friendly platform streamlines the process of finding information and scheduling lessons. The site enhances the overall experience for both students and Instructors.
